1. Random cracking across the ribs. Appearance: Small yet visible cracks along the length of a rib or ribs.. Cause: Continuous exposure to high temperatures and the stress bending around the pulleys leads to cracking. Cracks begin at the rib top and grow to the cord line. As a rule, if cracks appear 1 or 2 cm apart, 80% of the life is gone and the belt should be replaced.

A V-belt's purpose is to transmit energy between two components. What makes a V-belt pulley stand out from other types of pulleys, such as a round belt or flat pulley, are the shaped grooves of the pulley; these grooves guide the belt and allow it to gain traction. The number one cause of a power transmission belt failure is improper ...
